

Drushti Vagal

Aspiring Data Scientist | Machine Learning • NLP • Predictive Modeling • Python

Dombivli, Maharashtra, India, 421 201 • (+91)9867978435 • drushtivagal22@gmail.com

PROFESSIONAL SUMMARY

Data science-focused Computer Science undergraduate with experience building machine learning models, performing statistical analysis, and extracting insights from large datasets using Python, SQL, and ML libraries. Experienced in feature engineering, model evaluation, and predictive analytics across recommendation systems, segmentation, and forecasting use cases. Passionate about applying AI/ML to solve real-world business problems.

TECHNICAL SKILLS

- **Programming** - Python, SQL, R, Java
 - **Machine Learning & AI** - Scikit-learn, TensorFlow, Keras, NLP, Classification, Clustering, Regression, Model Evaluation, Feature Engineering
 - **Data Science Stack** - Pandas, NumPy, EDA, Data Cleaning, Statistical Analysis, Hypothesis Testing
 - **Data Visualization** - Matplotlib, Seaborn, Plotly, Power BI, Tableau
 - **Big Data / Platforms** - IBM Cloud, AWS (Foundations)
 - **Databases** - MySQL, PostgreSQL
 - **Other Tools** - Excel, REST APIs, Streamlit, Flask
-

EXPERIENCE

Data Analytics Intern — Startup Company [Remote | Aug 2025 – Jan 2026]

- Performed exploratory data analysis on structured datasets using Python (Pandas, NumPy) to identify patterns and data quality issues prior to modeling.
- Developed data pipelines and analytical dashboards supporting data-driven decision making and trend prediction.
- Collaborated with product and marketing teams to translate business needs into analytical deliverables.
- Built predictive models to analyze business trends and evaluated model performance using accuracy, precision, and F1-score metrics.

Research & Data Analytics Intern — IISPR [Remote | Dec 2025 – Jan 2026]

- Conduct market-focused research and policy-driven data analysis aligned with international development topics.
 - Prepare structured research reports and slide decks for Progress Tracking.
 - Track research milestones and coordinate deliverables with cross-functional teams.
 - Led weekly stakeholder meetings and maintained progress-tracking sheets to support project coordination.
-

PROJECTS

Machine Learning Recommendation System

- Developed a recommendation system using collaborative filtering on 50K+ user interaction records. Engineered 15+ features and evaluated multiple ML models using Scikit-learn. Achieved 18% improvement in recommendation accuracy and improved Precision@10 by 21%.

Customer Segmentation Project

- Performed clustering on 30K+ customer transactions using K-Means, identifying 5 distinct customer segments. Improved cluster quality by 20% based on Silhouette Score and generated insights supporting marketing strategy decisions.

Stock Market Prediction App

- Built a time-series forecasting model using 8 years of historical stock data (60K+ records). Reduced forecasting error by 15% (RMSE) and developed an automated data pipeline for real-time stock data ingestion and visualization.

NLP News Classification System

- Developed a machine learning NLP classifier trained on 25K+ news articles using TF-IDF and Scikit-learn models. Achieved 90% accuracy and 0.88 F1-score after hyperparameter optimization.
-

EDUCATION

• Terna Engineering College, Mumbai University | Bachelor of Engineering (Computer Science)
CGPA: 8.2 | 2022 – 2026 [Pursuing]

SIMULATIONS

- Bank of America Global Markets Sales & Trading Analyst Simulation – Forage (June 2025)
- Deloitte Data Analytics – Forage (July 2025)
- AWS Solutions Architecture – Forage (June 2025)

LANGUAGE

- English, Hindi, Marathi
-
